FEDERAL ENERGY REGULATORY COMMISSION

Greybull Valley Irrigation District

Project No. 12604-002

NOTICE OF PRELIMINARY PERMIT APPLICATION ACCEPTED FOR FILING
AND SOLICITING COMMENTS, MOTIONS TO INTERVENE, AND COMPETING
APPLICATIONS

On February 1, 2012, the Greybull Valley Irrigation District filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Lower Sunshine Reservoir Hydroelectric Power Project (Lower Sunshine Project or project) to be located on Sunshine Creek, near Meeteetse, Park County, Wyoming. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would utilize the existing Lower Sunshine dam and reservoir having a total storage capacity of 56,378 acre-feet at elevation 6,277 feet mean sea level, and would consist of the following new features: (1) a 50-foot-long, 6-foot-diameter penstock extending from the existing conduit to the powerhouse; (2) a powerhouse containing two turbine/generator units totaling 5 megawatts or less in capacity at 170 feet of net head; (3) a tailrace discharging flows to Sunshine Creek; (4) a 1,700-foot-long, 25-kilovolt (kV) transmission line extending from the project to a 69-kV transmission line owned by the Western Area Power Administration and Rocky Mountain Power (the point of interconnection); and (5) appurtenant facilities. The estimated annual generation of the Lower Sunshine Project would be 12.4 gigawatt-hours.
